The common tomato, suspected of being poisonous in 1837, was transformed into a household vegetable by the end of the nineteenth century, thanks to cheaper glass-making methods and the resulting increase in glasshouses. In addition to these fascinating images of past lives, Joan Thirsk reveals how the forces which drive our current interest in alternative forms of agriculture - a glut of mainstream meat and cereal crops; changing patterns of diet; the needs of medicine - have striking ...

People like to believe in a past golden age of "traditional" English countryside, before large farms, machinery, and the destruction of hedgerows changed the landscape forever. Yet crops from the past like flax, hemp, rapeseed, and woad are gradually reappearing in the "modern" countryside. Thirsk reveals how the forces which drive the current interest in alternative forms of agriculture--a ...
