But, what is electricity really? Let's start with three very basic concepts of electricity: namely, electric charge, electric current, and electric circuit. Electric charge refers to a fundamental property of matter that even physicists don't totally understand. Suffice it to say that two of the tiny particles that make up atoms – protons and electrons – are the bearers of electric charge.

The 15 lessons in this module introduce students to static and current electricity and electricity from chemical sources. Students investigate parallel and series circuits, conductors, insulators, and switches and design and construct their own electrical devices based on their learning. As well, students explore electromagnetism, motors, generators, and renewable and non-renewable sources of electricity. Students also investigate the environmental impact of human consumption and conservation of electrical energy. Also included: * Materials lists; * Activity descriptions; * Questioning techniques; * Activity centre and extension ideas; * Assessment suggestions; and * Activity sheets and visuals

The module offers a detailed introduction to the Hands-On Science program (guiding principles, implementation guidelines, an overview of the skills that young students use and develop during scientific inquiry), a list of children's books and websites related to the science topics introduced, and a classroom assessment plan with record-keeping templates.

This book gathers papers presented at the 22nd International Conference on Interactive Collaborative Learning (ICL2019), which was held in Bangkok, Thailand, from 25 to 27 September 2019. Covering various fields of interactive and collaborative learning, new

and techniques for teaching science derived from the Sixth Edition of Joseph Abruscato's successful comprehensive text, *Teaching Children Science: A Discovery Approach*. Allow your students to "discover" science through this practical text. New to This Edition: With a renewed focus on the NSE content standards, this text provides clear direction of what teachers need to know to be prepared for the classroom. Discusses implementation of the NSE K-8 Content Standards and provides curriculum responsive to those standards. Covers elementary science topics including earth and space science, life science, physical sciences, and technology in a lively and engaging style that students find accessible. Satisfies the NSE standards of "the human side of science" (all chapters). Continuing its strength in supportive pedagogy, this text guides students into discovery. Features such as "A Look Ahead," "Go Further," "Quick Checks," and "Demonstrations" provide students with tangible suggestions to bring into the classroom. "This is an excellent resource for future teachers to have during their actual teaching." Professor Russell Agne, The University of Vermont "Dr. Abruscato's writing style appeals to those who aspire to teach science as well as to those who have a desire to teach but are among the many who tend to be science shy." Professor Jim Dawson, Rochester College Author bio: Dr. Joseph Abruscato received his Bachelors and
