With its towering mountains, sun-scorched deserts, fierce wildlife, and hard-to-predict weather, the American West ranks among the most forbidding places on Earth. Yet many are drawn to the beauty of this wild and rugged region. Some are daredevils. . .some are athletes. . .and some are outdoors enthusiasts who find themselves in a chilling battle for survival. In their extraordinary, heart-stopping true stories, you will discover how much can go wrong when people find themselves caught in the cross-hairs of nature's power. . . Dare To Survive Flash floods, plane crashes, animal attacks, avalanches, landslides—these devastating phenomena all too often claim the lives of men, women, and children in the American West. But some beat the odds, living to tell about their terrifying ordeals. There are inspirational stories of extreme survival and tremendous bravery. Of the hiker who—though armed with only a knife—survived a 30-minute nightmare with a cougar. . .of the backcountry snowboarder buried alive by an avalanche, saved with only minutes to spare. . .of the outdoorsman pinned by an 800-pound boulder who freed himself by amputating his own arm. . .And there are the unexplainable, senseless tragedies—the little girl whose mysterious disappearance at a national park was never solved. . . the inexperienced charter pilot who crashed trying to beat curfew in a snowstorm. . .and the veteran backwoods camper who, despite every precaution, fell victim to a fatal bear attack. What does it take to endure the impossible? Dare to Survive tackles that question as it vividly reminds us that when danger strikes, survival becomes the ultimate human challenge. "This frightening but enjoyable book reveals that Mother Nature has more ways to kill than even the toughest Mafia godfather." --Ted Schwarz, author of Hollywood Confidential: How the Studios Beat the Mob at Their Own Game Rick Rinehart is a publisher, writer, and former Colorado Humanities Scholar whose honors include recognition by the National Park Service for contributions to wolf recovery in Yellowstone National Park. His wife, Amy Rinehart, is a former publisher of endurance sports books who consults with outdoor retail and environmental organizations in the development of publishing programs. Rick and Amy live in Lafayette, Colorado.

The chilling tone that launched an entire genre of books about the often gruesome but always tragic ways people have died in our national parks, this updated edition of the classic includes calamities in Yellowstone from the past sixteen years, including the infamous grizzly bear attacks in the summer of 2011 as well as a fatal hot springs accident in 2000. In these accounts, written with sensitivity as cautionary tales about what to do and what not to do in one of our wildest national parks, Whittesey recounts deaths ranging from tragedy to folly—from being caught in a freak avalanche to the goring of a photographer who just got a little too close to a bison. Armchair travelers and park visitors alike will be fascinated by this important book detailing the dangers awaiting in our first national park.

Men of Kent is, first and foremost, an archetypal sports tale—a story of the improbable happening to the unlikely, unfolding against the backdrop of a turbulent era. Both an homage and a unique inside look at the fast-growing sport of rowing, it embraces the sport's history, traditions, and culture as it tells the story of ten ordinary boys and their coach from Kent, Connecticut, who found themselves in extraordinary circumstances during the spring and summer of 1972. The Kent School's 1972 crew, of which the author was a part, had a 46-0 winning streak, broke three course records, and claimed a national championship. In its final race, at the fabled Henley Royal Regatta in England—a race broadcast on television worldwide—it barely edged the Canadian National Champions. Kent's achievement merited a banner headline in the New York Times sports section, and is regarded as one of the most breathtaking finishes in Henley's long history.

The concept of a "good death" has been debated since the beginning of civilization. In the 21st Century, longer lifespans and advances in medicine have resulted in new legislation regarding an individual's "right to die." The option to end one's own life, when pain becomes intolerable or the quality of life is nonexistent, is an issue at the forefront of modern society. Who among us would trade places with a patient, dependent on machines and other people, for every aspect of their life? Who among us wouldn't choose doctor-assisted death, if that option were available? During the last two decades, the states of Oregon, Washington, and Montana passed euthanasia legislation, and in the Netherlands, Belgium, and Luxembourg, similar end-of-life regulations were authorized. However, in 2012, two court cases examining physician-assisted death could lead to new international precedents: Gloria Taylor, who suffered from Lou Gehrig's disease, became the first person in Canada to be granted the "right to die" via a "personal exemption" by British Columbia's Supreme Court; in Britain, Tony Nicklinson, who suffered from "locked-in syndrome" and could only communicate by blinking, died from pneumonia after refusing food and fluids subsequent to a High Court decision that refused to grant him assisted death. In this age of medical technology, of machines sustaining lives irrespective of quality of life and dignity, we often discount the concept of a "good death." Allowing terminally ill people to pass on quickly and peacefully does not encroach on the civil liberties of others. Euthanasia legislation allows patients to operate within the medical system and ease their anxiety, while giving friends and family peace of mind. Assessing the quality of life, and allowing patients who suffer from debilitating pain and dependence on others to gently leave this life, gives people a dignified alternative. Read To Gently Leave This Life to learn what you need to know about end-of-life decisions. To Gently Leave This Life is the perfect reference book for the grassroots activist, legislator, and for people who are dealing with their own or a loved one's terminal illness.

Penniless, Pamela is forced to move into a boarding house in the Lower East Side and accept a position at Macy's—as a store detective.
