Tony is a palaeontology researcher but also a Professor at the Department of Integrative Biology at the University of California, Berkeley. He spent over thirty years analysing climatic changes at a global scale and their influence on species evolution, and above all synthesising what we can learn from the past.

The film | Demain

DEMAIN is about giving a little back, appreciating what life offers us every day, and helping children whose prospects are unfairly disadvantaged. This major philanthropic program supports concrete actions in favour of access to education, culture, and equal opportunities for children around the world.

Demain (2009) - IMDb

Dr. Jeffrey G. Demain is an allergist-immunologist in Anchorage, Alaska and is affiliated with multiple hospitals in the area. He has been in practice for more than 20 years.

A Demain is a book that should have a lot of appeal to a mature audience. It is a different approach to the common description of the senior years. The book uses characters who participate in a life that rises above the gray life that descends on people above sixty years on this earth. The characters have the common health issues, but their relationship with their doctor is not the most important relationship in their life. These characters seek to be part of a meaningful relationship with others, Sex is still an important segment of their wellbeing. Their language is one that is not faint; it is colorful and on point in all situations. A person reading this might say, “My friends don’t talk like that, but I wish they did.” This book would bring a smile to the majority of readers and they would recognize a lot of the happenings in the book. The growing importance of personal relationships as age increases is a keystone to this book.

L'U.R.S.S. Aujourd'hui et Demain

This book brings together the lectures given at the Les Houches summer school "Infrared space astronomy, today and tomorrow". It gives a wide overview of infrared astronomy, a wavelength domain crucial for studies of the solar system, stars at the beginning and end of their lives, interstellar matter and galaxies at all distances. Recent developments in observational techniques have been tremendous. The first contributions give an introduction to the basic physical processes and methods of detection and data processing. They are followed by a series of lectures dealing with the wide variety of astronomical objects that can be seen in the infrared.

Thirty-four papers on the future of Eskimo societies in Alaska, Canada, Greenland, and USSR.

Qu'est-ce qu'un grand homme ? On n'y répondra pas sans rompre le pieux consensus qui salue dans le héros du 18 juin la voix plus que le texte, la grandeur plus que la pertinence, le panache du rebelle plutôt que la sagesse de celui qui avait prévu et préparé l'actuel chambardement de l'Europe et de nos illusions. Remplacer l'engensoir par le télescope. Procéder à un renversement d'optique. Au lieu de la dernière figure du XIXe siècle, découvrir le premier contemporain du XXie siècle. A la place du vieux sorcier nationaliste, le sorcier des surprises de demain. Car le neuf et le vieux échangent aujourd'hui leur place. De Gaulle fonde le courage du résistant sur l'intelligence de ce qui résiste. D'ou la prescience du long terme. Un enseignement scandaleux qui aidera la gauche à renaitre de ses cendres, pour un nouveau cycle d'histoire.
