The aims in drying out a building are to bring it to a fit state to receive internal finishes and decoration and to avoid damage or disfigurement of work already done. This digest describes some ways of drying out and also methods of testing the condition of walls, floors and joinery. Although economic considerations will usually call for early completion and, hence, rapid drying, excessively fast drying will cause troubles.

"From the shores of Cape Town, Robben Island seems as ordinary as any other land formation that dots the ocean. It is only when one steps onto the island, peering into its now empty prison cells, that the full impact of its history is realised. Once a colonial and apartheid prison, Robben Island is now a museum and a World Heritage Site. Although it tells the tales of

the thousands that it imprisoned, Robben Island is also a story of survival. It is for this reason that prisoner 468/64 keeps going back. Since 1994, Rivonia Trialist, Ahmed Kathrada, has taken some 300 guests from around the globe on tours of the island. This book offers a glimpse into the visits and the guests themselves which, amongst other things, include heads of state, celebrities, royalty, students, activists, sports personalities and ordinary folk. Kathrada is dedicated to preserving history. It is perhaps for this reason also, that he keeps going back to the place of his imprisonment, telling the stories of his fellow revolutionaries , who despite being jailed, were sure of freedom ” --Dust jacket

Society (EBES) Conference, held in Madrid, Spain. While the theoretical and empirical papers presented cover diverse areas of economics and finance in different geographic regions, the main focus is on the latest research concerning international trade, public economics, and regional studies. The book also includes studies on the economics of innovation, inequality and tourism.

The first up-to-date summary and review for the fundamental principles and industrial practice of adsorption separation processes in more than 30 years. Emphasizes the understanding of adsorption column dynamics and the modeling of adsorption systems, as well as fundamental aspects of kinetics and equilibria.
