Excretory System Activities For Kids
Description. Our Excretory System lesson plan introduces students to the basics of the excretory system. During this lesson, students are asked to work with a partner to create a story from the perspective of a drop of liquid on a journey through the excretory system, illustrating the processes of the excretory system in a creative way; students will then share their stories with the class, practicing their presentation skills.

Follow Nat Geo Kids as we take a journey down through the human digestive system to find out where our grub goes! The human digestive system. It takes around 24 hours for your dinner to wind its way through the nine-metre-long digestive tract.On its trip, it 's mixed with acids and digestive juices, and squeezed and squelched until all the nutrients that the body needs are absorbed.

The human digestive system | National Geographic Kids
The various activities of the body create waste by-products that must be expelled in order to maintain health. To excrete certain fluid wastes, the body has a specialized filtering and recycling system known as the urinary, or excretory, system. Solid wastes are eliminated, or egested, through the large intestine (see digestive system).
