u0007 OQL is DMGs query language u0007 OQL works closely with programming languages such as C++ u0007 Embedded OQL statements return objects that are compatible with the type system of the host language u0007 OQLs syntax is similar to SQL with additional features for objects Elmasri/Navathe, Fundamentals of Database Systems, Fourth Edition

Fundamentals of Database Systems - Scribd

“Fundamentals of Database Systems is a leading example of a database text that approaches the subject from the technical, rather than the business perspective. It offers instructors more than enough material to choose from as they seek to balance coverage of theoretical with practical material, design with programming, application concerns with implementation issues, and items of historical interest with a view of cutting edge topics.
