Play an open “A” on the thinnest string on the left end. The last string on the left, and the thinnest string, is your “A” string. Pluck the “A” string to see how it sounds. A good way to remember the string notes on your cello is the sentence “Cats Go Down Alleys” starting from your right with the thickest “C” string. ...

How Strategy Really Works is a book about strategy, written by A.G. Lafley, former CEO of Procter & Gamble, and Roger Martin, dean of the Rotman School of Management. The book covers the “transformation” of P&G under Lafley and the approach to strategy that informed it. This approach grew out of the strategy practice at Monitor Company and subsequently became the standard process at P& G.

~~Playing to Win: How Strategy Really Works~~

Sit down at the piano or keyboard and familiarize yourself with it. Play with it and identify the middle tones (middle of piano), flat tones (left black keys), sharp tones (right black keys), bass tones (low sounds) and high tones (high sounds). Really listen to each of them, and note how they are different from the others.

Classically trained and working through "How to Really Play the Piano" by Bill Hilton, not sure what to do to actually learn this stuff I've been playing classical music for about 6 years now and really want to transition to learning music theory, comping, playing lead sheets, and solo arrangements.

Now you can master Bach's most beautiful prelude—even if you've never sat down at a piano before! Do you have a piano (or keyboard) and forty-five spare minutes every day? Then spend the next six weeks with acclaimed concert pianist James Rhodes. By the end, you'll be able to perform Bach's Prelude No. 1 in C major—no prior musical experience required! Rhodes reveals How to Play the Piano step by step—how to read the treble and bass clefs as well as sharp and flat notes, and then how to practice—before teaching the Prelude in easy, bite-size segments. His method is free of tedious drills, and filled with inspiration: "If listening to

music is soothing for the soul, then playing music is achieving enlightenment.” Before you know it, not only will you have learned how to play one of Bach’s most beloved masterpieces—you also will have unleashed your creativity, exercising your mind (and fingers) and accomplishing something you never thought possible. Bravo! Includes four instructional videos supported by select e-reader devices.

Today, we don't get nearly enough play in our lives. At school, kids are drilled on exams, while at home we're all glued to our phones and screens. Former children's laureate and bestselling author, Michael Rosen, is here to show us how to put this right - and why it matters so much for creativity, resilience and much more. Packed with silliness, activities and prompts for creative indoor and outdoor play for all ages - with specially illustrated pages for everything from doodling to word play and after-dinner games.

Explains how companies must pinpoint business strategies to a few critically important choices, identifying common blunders while outlining simple exercises and questions that can guide day-to-day and long-term decisions.

Taro Gomi invites children to punch out more than 60 fantastic playthings, including ring-toss games, finger puppets, boxes, picture frames, a zoo's worth of animals, and more! Packed with Gomi's fun, accessible artwork and a delightful variety of games and toys, this book will appeal to children of all ages, engaging their imaginations and entertaining them all day long.

How family video game play promotes intergenerational communication, connection, and learning. Video games have a bad reputation in the mainstream media. They are blamed for encouraging social isolation, promoting violence, and creating tensions between parents and children. In this book, Sinem Siyahhan and Elisabeth Gee offer another view. They show that video games can be a tool for connection, not isolation, creating opportunities for families to communicate and learn together. Like smartphones, Skype, and social media, games help families stay connected. Siyahhan and Gee offer examples: One family treats video game playing as a regular and valued activity, and bonds over Halo. A father tries to pass on his enthusiasm for Star Wars by playing Lego Star Wars with his young son. Families express their feelings and share their experiences and understanding of the world through playing video games like The Sims, Civilization, and Minecraft. Some video games are designed specifically to support family conversations around such real-world issues and sensitive topics as bullying and peer pressure. Siyahhan and Gee draw on a decade of research to look at how learning and teaching take place when families play video games together. With video games, they argue, the parents are not necessarily the teachers and experts; all family members can be both teachers and learners. They suggest video games can help families form, develop, and sustain their learning culture as well as develop skills that are valued in the twenty-first century workplace. Educators and game designers should take note.

This unique, fun approach to teaching piano utilizes popular hymns with the chord system for simplicity.

Now Available in Paperback! In *Einstein Never Used Flashcards* highly credentialed child psychologists, Kathy Hirsh-Pasek, Ph.D., and Roberta Michnick Golinkoff, Ph.D., with Diane Eyer, Ph.D., offer a compelling indictment of the growing trend toward accelerated learning. It's a message that stressed-out parents are craving to hear: Letting tots learn through play is not only okay-it's better than drilling academics! Drawing on overwhelming scientific evidence from their own studies and the collective research results of child development experts, and addressing the key areas of development-math, reading, verbal communication, science, self-awareness, and social skills-the authors explain the process of learning from a child's point of view. They then offer parents 40 age-appropriate games for creative play. These simple, fun--yet powerful exercises work as well or better than expensive high-tech gadgets to teach a child what his ever-active, playful mind is craving to learn.

A developmental psychologist argues that children who are freed to follow their own interests through self-directed play will become better learners and achievers than the way they learn in modern school, which he says shows them that learning is work and not fun. 15,000 first printing.
