Once you feel compression building, look for the zero mark on the harmonic balancer to approach the timing tag. We prefer to set the initial timing for most engines at 10 degrees Before Top Dead Center (BTDC). With that set, remove the cap from the distributor. We ' re using a Summit HEI distributor. We use a black Sharpie to place a mark on the distributor body where we want the Number One spark plug wire to be located.

Again, the "set timing on"
command is a SQL*Plus command,
but you can measure run time for
Oracle SQL with a variety of
Oracle tools. Sometimes when
working on SQL command
optimizations, all that is desired is
a rough timing estimate; namely,
the SQL*Plus client elapsed
execution time, or simple clock
time.
