Music is rooted in the heart of Western culture. The absence of music from the usual publications of medieval history and history of art of the Middle Ages is understandable, considering the rarity of sources. And yet, throughout the last decades, an intense activity of historico-musicological research has been carried out internationally by a select group of specialized scholars. The ambitious goal of this work is to set medieval music within its historical and cultural context and to provide readers interested in different disciplines with an overall picture of music in the Middle Ages; multi-faceted, enjoyable, yet scientifically rigorous. To achieve this goal, the most prominent scholars of medieval musicology were invited to participate, along with archaeologists, experts of acoustics and architecture, historians and philosophers of medieval thought. The volume offers exceptional iconography and several maps, to accompany the reader in a fascinating journey through a network of places, cultural influences, rituals and themes.

This impressive edited collection investigates the relationship between British Pop Art pioneer Eduardo Paolozzi and the philosopher Ludwig Wittgenstein. At this time, when Paolozzi's oeuvre is in the process of being rediscovered, his long-time fascination with Wittgenstein requires thorough exploration, as it discloses a deeper understanding of his artistic production, further helping to reassess the philosopher's actual impact on visual arts and its theory in the second half of the 20th century. With 13 diverse and comprehensive chapters, bringing together philosophers and art historians, this volume aims at retracing and pondering the influence of Wittgenstein on the idea of art in Paolozzi, thus giving an unprecedented insight into Wittgenstein's philosophy as employed by contemporary artists.

The archetypal Onetti hero, Medina is at different times of his life a (phoney) doctor, a painter and a police chief. He lives in Lavanda, across the river from Santa Maria, a town he is not allowed to enter and that he, therefore, wishes to destroy. In the end the wind speaks with devastating effect. The first novel written in exile in Spain, *Let the Wind Speak* is Onetti coming to terms with his exclusion from the Santa Marias of his childhood, his first sexual conquests, his first cigarettes, his first double whiskeys. A lover's bitter lament - it ends in the destruction of the object of adoration.

A lonely squirrel goes searching for a new home, only to discover that the best place is one where the whole community can live together. Joining Barefoot's acclaimed collection of social-emotional titles, this tale offers the perfect opportunity to start conversations about coping with loneliness, the importance of community, and what makes a place feel like home. Beautiful illustrations by award-winning Italian artist Simona Mulazzani bring Squirrel's journey to life.

A revised edition of this major writer's complete poetical work *And I who was walking with the earth at my waist, saw two snowy eagles and a naked girl*. The one was the other and the girl was neither. -from "Qasida of the Dark Doves" Federico García Lorca was the most beloved poet of twentieth-century Spain and one of the world's most influential modernist writers. His work has long been admired for its passionate urgency and haunting evocation of sorrow and loss. Perhaps more persistently than any writer of his time, he sought to understand and accommodate the numinous sources of his inspiration. Though he died at age thirty-eight, he left behind a generous body of poetry, drama, musical arrangements, and drawings, which continue to surprise and inspire. Christopher Maurer, a leading García Lorca scholar and editor, has brought together new and substantially revised translations by twelve poets and translators, placed side by side with the Spanish originals. The seminal volume *Poet* in New York is also included here in its entirety. This is the most comprehensive collection in English of a poet who—as Maurer writes in his illuminating introduction—"spoke unforgettably of all that most interests us: the otherness of nature, the demons of personal identity and artistic creation, sex, childhood, and death."

This unique book weaves linguistic, cultural, and historical themes together to form a concise and accessible account of the development of the Slavic languages. Alexander Schenker demonstrates that inquiry into early Slavic culture requires an understanding of history, language, and texts and that an understanding of early Slavic writing is incomplete outside the context of medieval culture. Drawing on contemporary manuscripts and other primary sources, Schenker presents a historical sketch of Slavic settlement in Europe, tracing the migrations, the political maneuvers, and the integration of the Slavs into the medieval European cultural commonwealth. He next outlines the development of Slavic from its Indo-European origins to the breakup of Slavic linguistic unity and the formation of individual Slavic dialects. In a chapter devoted to the beginnings of Slavic writing, he includes a thematic classification of the oldest Slavic texts, a section on Slavic paleography, and a discussion of the formation of Old Church Slavonic and its

role as the first Slavic literary language. An overview of the development of Slavic philology, samples of early Slavic writing with facsimile illustrations, maps, and a chronological table contribute further valuable material to this volume.

After Words investigates how the suicide of an author informs critical interpretations of the author's works. Suicide itself is a form of authorship as well as a revision, both on the part of the author, who has written his or her final scene and revised the 'natural' course of his or her life, and on the part of the reader, who must make sense of this final act of writing. Elizabeth Leake focuses on twentieth-century Italian writers Guido Mor-selli, Amelia Rosselli, Cesare Pavese, and Primo Levi, examining personal correspondence, diaries, and obituaries along with popular and academic commemorative writings to elucidate the ramifications of the authors' suicides for their readership. She argues that authorial suicide points to the limitations of those critical stances that exclude the author from the practice of reading. In this innovative and accessible assessment of some of the key issues of authorship, Leake shows that in the aftermath of suicide, an author's life and death themselves become texts to be read.

An old woman is awoken in the dead of night by knocks at her front door. The woman opens it to find her daughter, Doruntine, standing there alone in the darkness. She has been brought home from a distant land by a mysterious rider she claims is her brother Konstandin. But unbeknownst to her, Konstandin has been dead for years. What follows is chain of events which plunges a medieval village into fear and mistrust. Who is the ghost rider?
