a crucial area for study that requires a deep international understanding for effective implementation. Despite the immense benefits of mentoring, current literature on this subject is surprisingly sparse. The Wiley International Handbook of Mentoring fills the need for a comprehensive volume of in-depth information on the different types of mentoring programs, effective mentoring practices, and emerging practical and applicable theories. Based on sound research methodologies, this unique text presents original essays by experts from over ten different countries, demonstrating the ways mentoring can make a difference in the workplace and in the classroom; these experts have an understanding of mentoring worldwide having worked in mentoring in over forty countries. Each of the Handbook's four sections—mentoring paradigms, practices, programs, and possibilities—include a final synthesis chapter authored by the section editors that captures the essence of the lessons learned, applies a global context, and recommends research avenues for further exploration. This innovative volume demonstrates how mentoring in any culture can help employees to complete tasks and advance in their positions, aid in socialization and assimilation in various settings, provide diverse groups access to resources and information, navigate through personalities, politics, policies, and procedures, and much more. Offers an inclusive, international perspective that supports moving mentoring into a discipline of its own and lays a theoretical foundation for further research Shows how emerging practical theories can be implemented in actual programs and various scenarios Examines a wide range of contemporary paradigms, practices, and programs in the field of mentoring, including a panorama of introspections on mentoring from international scholars and practitioners Includes historical and epistemological content, background information and definitions, and overviews of fundamental aspects of mentoring The Wiley International Handbook of Mentoring is an essential volume for a global readership, particularly teachers of mentoring courses, trainers, and researchers and practitioners in a variety of fields such as business, education, government, politics, sciences, industry, or sports.

To meet the dynamic academic demands of twenty-first century digital learners, many institutions of higher learning are offering more online classes than ever before that are accessible to both traditional and non-traditional learners. As such, a growing demand for online courses implies that participating institutions provide faculty with appropriate professional development programs to ensure the design and delivery of quality online courses. The Handbook of Research on Virtual Training and Mentoring of Online Instructors is a critical scholarly resource that highlights the issues, challenges, and online engagement experiences to enhance effective teaching and learning in this learning environment. Featuring coverage on a broad range of topics such as media literacy, professional development, and virtual learning environments, this book is geared towards educational administrators, educators, and instructional designers interested in quality online instruction.

Faculty mentoring programs greatly benefit the institutions that have instituted them, and are effective in attracting and retaining good faculty. Prospective faculty members commonly ask about mentoring at on-campus interviews, and indicate that it is a consideration when choosing a position. Mentoring programs also increase the retention rate of junior faculty, greatly reducing recruitment costs, and particularly help integrate women, minority and international faculty members into the institution, while providing all new hires with an orientation to the culture, mission and identity of the college or university. The book provides step-by-step guidelines for setting up, planning, and facilitating mentoring programs for new faculty members, whether one-on-one, or using a successful group model developed and refined over twenty-five years by the authors. While it offers detailed guidance on instituting such programs at the departmental level, it also makes the case for establishing school or institutional level programs, and delineates the considerable benefits and economies of scale these can achieve. The authors provide guidance for mentors and mentees on developing group mentoring and individual mentor / protégé relationships – the corresponding chapters being available online for separate purchase; as well as detailed outlines and advice to department chairs, administrators and facilitators on how to establish and conduct institution-wide group mentoring programs, and apply or modify the material to meet their specific needs. For training and faculty development purposes, we also offer two chapters as individual e-booklets. Each respectively provides a succinct summary of the

Drawing on extensive research and the authors' own experiences as coaches and mentors, the book offers a critical perspective on the theory and practice of coaching and mentoring. The Third Edition is split into four parts and has been updated to include the contemporary debates, issues and influences in the field. It features a collection of new international case-studies, drawn from the USA, Africa, Asia and South America, along with an increased emphasis on current topics such as internal coaching schemes, e-technologies and social media. In addition to these features, there are four new chapters: Perspectives on Coaching and Mentoring from around the Globe – Comparing case studies written by practitioners in locations around the world. The Skilled Coachee – An examination of the role of coachee in the coaching and mentoring process. Question of Ethics – A chapter devoted to the ethical issues inherent in coaching and mentoring. Towards a Meta-Theory – A chance for the reader to conceive new ways to engage with theory and practice. The book is complemented by a companion website featuring a range of tools and resources for instructors and students, including PowerPoint slides, flash-cards and access to full text SAGE Journal articles. Suitable reading for students on coaching and mentoring modules.

Mentoring can solve a whole host of organizational ills from employee turnover to generalized employee dissatisfaction. This issue describes three mentoring approaches that you can use to install this powerful performance tool in your organization. You will get detailed descriptions of one-on-one mentoring, group mentoring, and virtual mentoring, along with advice on mentor selection and strategies to be successful. A mentoring program planner is also included.

Written by two leading scholars in the field, this book is an essential guide to the theory and practice of coaching and mentoring. The 4th Edition features:

- New content on the definitional issues and the hybridization of coaching and mentoring
- Revised analysis on the research terrain of coaching and mentoring
- Careful consideration of the impacts of the Covid-19 pandemic on coaching and mentoring
- New and updated case studies and examples from a wide range of countries, including the USA, Africa, Saudi Arabia, Hong Kong, Russia, Australia, South America, the Czech Republic and Sri Lanka
- Updated activities, reflective questions and annotated further reading at the end of each chapter

This book also comes with an Instructor's Manual and PowerPoint slides for lecturers to use in their teaching. Suitable reading for students on coaching and mentoring modules. Bob Garvey is Managing Partner of the Lio Partnership, a coaching and mentoring consultancy.
