In Jurassic Park schiep Michael Crichton een angstaanjagende nieuwe wereld. In Micro onthult hij een universum dat te klein is om te zien, maar te gevaarlijk om te negeren. Zeven getalenteerde Amerikaanse studenten onderbreken hun studie om te gaan werken voor het microbiologische bedrijf Nanigen. Ze reizen af naar het hypermoderne researchcomplex op Hawaï, waar ze in aanraking komen met een ...

Micro by Michael Crichton - Books on Google Play

Now, in Micro, Michael Crichton reveals a universe too small to see and too dangerous to ignore. In a locked Honolulu office building, three men are found dead with no sign of struggle except for the ultrafine, razor-sharp cuts covering their bodies. The only clue left behind is a tiny bladed robot, nearly invisible to the human eye.

In the vein of Jurassic Park, this high-concept thriller follows a group of graduate students lured to Hawaii to work for a mysterious biotech company—only to find themselves cast out into the rain forest, with nothing but their scientific expertise and wits to protect them. In the lush forests of Oahu, groundbreaking technology has ushered in a revolutionary era of biological prospecting, feeding a search for priceless drugs and applications on a scale beyond anything previously imagined. In Cambridge, Massachusetts, seven graduate students at the forefront of their fields are recruited by a pioneering microbiology start-up, Nanigen MicroTechnologies, which dispatches the group to a mysterious lab in Hawaii. But once in the rainforest, the scientists are thrust into a hostile wilderness that reveals surprising dangers at every turn. Armed only with their knowledge of the natural world, they find themselves prey to a technology of radical and unbridled power An instant classic, Micro pits nature against technology in vintage Michael Crichton fashion. Completed by visionary science writer Richard Preston, this boundary-pushing thriller melds scientific fact with pulse-pounding fiction to create yet another masterpiece of sophisticated, cutting-edge entertainment.

Michael Crichton's Prey is a terrifying page-turner that masterfully combines a heart-pounding thriller with cutting-edge technology. Deep in the Nevada desert, the Xymos Corporation has built a state-of-the-art fabrication plant, surrounded by miles and miles of nothing but cactus and coyotes. Eight people are trapped. A self-replicating swarm of predatory molecules is rapidly evolving outside the plant. Massed together, the molecules form an intelligent organism that is anything but benign. More powerful by the hour, it has targeted the eight scientists as prey. They must stop the swarm before it is too late... In Prey, Michael Crichton combines scientific brilliance with relentless pacing to create an electrifying, chilling techno-thriller

New York Times bestselling author Michael Crichton delivers another action-packed techo-thriller in State of Fear. When a group of eco-terrorists engage in a global conspiracy to generate weather-related natural disasters, its up to environmental lawyer Peter Evans and his team to uncover the subterfuge. From Tokyo to Los Angeles, from Antarctica to the Solomon Islands, Michael Crichton mixes cutting edge science and action-packed adventure, leading readers on an edge-of-your-seat ride while offering up a thought-provoking commentary on the issue of global warming. A deftly-crafted novel, in true Crichton style, State of Fear is an exciting, stunning tale that not only entertains and educates, but will make you think.

From the author of Jurassic Park, Timeline, and Congo comes a psychological thriller about a group of scientists who investigate a spaceship discovered on the ocean floor. In the middle of the South Pacific, a thousand feet below the surface, a huge vessel is unearthed. Rushed to the scene is a team of American scientists who descend together into the depths to investigate the astonishing discovery. What they find defies their imaginations and mocks their attempts at logical explanation. It is a spaceship, but apparently it is undamaged by its fall from the sky. And, most startling, it appears to be at least three hundred years old, containing a terrifying and destructive force that must be controlled at all costs.

Contains an exclusive preview of Micro by Michael Crichton and Richard Preston. In Port Royal, a cutthroat town of taverns, grog shops and bawdy houses, life can end swiftly. But for Captain Edward Hunter, this is a life destined for riches; Spanish gold is there for the taking. And law in the New World is made by those who take it into their own hands.

Michael Crichton, the #1 New York Times bestselling author of Jurassic Park, returns to the world of paleontology in this recently discovered novel—a thrilling adventure set in the Wild West during the golden age of fossil hunting. The year is 1876. Warring Indian tribes still populate America’s western territories even as lawless gold-rush towns begin to mark the landscape. In much of the country it is still illegal to espouse evolution. Against this backdrop two monomaniacal paleontologists pillage the Wild West, hunting for dinosaur fossils, while surveilling, deceiving and sabotaging each other in a rivalry that will come to be known as the Bone Wars. Into this treacherous territory plunges the arrogant and entitled William Johnson, a Yale student with more privilege than sense. Determined to survive a summer in the west to win a bet against his arch-rival, William has joined world-renowned paleontologist Othniel Charles Marsh on his latest expedition. But when the paranoid and secretive Marsh becomes convinced that William is spying for his nemesis, Edwin Drinker Cope, he abandons him in Cheyenne, Wyoming, a locus of crime and vice. William is forced to join forces with Cope and soon stumbles upon a discovery of historic proportions. With this extraordinary treasure, however, comes exceptional danger, and William’s newfound resilience will be tested in his struggle to protect his cache, which pits him against some of the West’s most notorious characters. A page-turner that draws on both meticulously researched history and an exuberant imagination, Dragon Teeth is based on the rivalry between real-life paleontologists Cope and Marsh; in William Johnson readers will find an inspiring hero only Michael Crichton could have imagined. Perfectly paced and brilliantly plotted, this enormously winning adventure is destined to become another Crichton classic.

In a novel set within the arena of volatile Japanese-American relations, business moguls compete for control of the international electronics industry.

#1 NEW YORK TIMES BESTSELLER • From the author of Timeline, Sphere, and Congo, this is the classic thriller of science run amok that took the world by storm. Nominated as one of America’s best-loved novels by PBS’s The Great American Read “[Michael] Crichton’s dinosaurs are genuinely frightening.”—Chicago Sun-Times An astonishing technique for recovering and cloning dinosaur DNA has been discovered. Now humankind’s most thrilling fantasies have come true. Creatures extinct for eons roam Jurassic Park with their awesome presence and profound mystery, and all the world can visit them—for a price. Until something goes wrong. . . . In Jurassic Park, Michael Crichton taps all his mesmerizing talent and scientific brilliance to create his most electrifying technothriller. Praise for Jurassic Park “Wonderful . . . powerful.”—The Washington Post Book World “Frighteningly real . . . compelling . . . It’ll keep you riveted.”—The Detroit News “Full of suspense.”—The New York Times Book Review

Thomas Sanders' world collapses in just 24 hours - he is passed over for promotion, his new woman boss comes on to him during a drink after work, then, the next morning, he learns that she has accused him of sexually harassing her. She demands his transfer, thereby threatening to cut him off from the millions he would have made.

Contains an exclusive preview of Micro by Michael Crichton and Richard Preston. Is a loved one missing some body parts? Are blondes becoming extinct? Is everyone at your dinner table of the same species? Humans and chimpanzees differ in only 400 genes; is that why a chimp fetus resembles a human being? And should that worry us? There's a new genetic cure for drug addiction—is it worse than the disease? We live in a time of momentous scientific leaps, a time when it's possible to sell our eggs and sperm online for thousands of dollars and to test our spouses for genetic maladies. We live in a time when one fifth of all our genes are owned by someone else, and an unsuspecting person and his family can be pursued cross-country because they happen to have certain valuable genes within their chromosomes . . . Devilishly clever, Next blends fact and fiction into a breathless tale of a new world where nothing is what it seems and a set of new possibilities can open at every turn. Next challenges our sense of reality and notions of morality. Balancing the comic and the bizarre with the genuinely frightening and disturbing, Next shatters our assumptions and reveals shocking new choices where we least expect. The future is closer than you think.
