This book presents biographical portraits of 22 of psychology's pioneers, portraits of them as men and women as well as scientists. All of these portraits, many of them offered by a descendant, colleague, or student of the pioneer, are informal. Most of them are lighthearted, even humorous, in their approach. A few are intimate and personal.

This third volume in a series devoted to luminaries in the history of psychology--features chapter authors who are themselves highly visible and eminent scholars. They provide glimpses of the giants who shaped modern cognitive and behavioral science, and shed new light on their contributions and personalities, often with a touch of humor or whimsy and with fresh personal insights. The animated style, carefully selected details, and lively perspective make the people, ideas, and controversies in the history of psychology come alive. The fields touched on in this and other volumes cover all of the subfields of psychology. As such, all volumes of Portraits of Pioneers in Psychology will be of interest to psychologists, as well as scholars in related fields. The resourceful teacher could use a selection of chapters as supplementary readings to enhance almost any course in the discipline. The major purpose of these books is to provide source materials for students and their teachers in undergraduate and graduate courses in the history of psychology. Each of the five volumes in this series contains different profiles thereby bringing more than 100 of the pioneers in psychology more vividly to life.

This fourth book in the series continues the tradition of the popular earlier volumes by offering lively and entertaining information about some of contemporary psychology's most illustrious ancestors. The 21 chapters, many of them written by today's most visible and eminent authors, concentrate on the lives and achievements of major psychologists from a variety of areas. Created for undergraduate and graduate courses in the history of psychology, the variety of pioneers represented provide enough flexibility to also use it as a supplemental reader in other psychology courses. Each of the five volumes in this series contains different profiles thereby bringing more than 100 of the pioneers in psychology more vividly to life.

Utilizing an informal, sometimes humorous style of writing, this book brings to life 16 developmental psychologists who made a significant contribution to their field. Written by noted scholars, each chapter provides a glimpse into the personal and scholarly lives of these innovative "pioneers". Some of the chapters are based on the contributor's personal acquaintance with a pioneer allowing for the introduction of previously unavailable information. Suggested Readings allow readers to delve deeper into the material and a tabular list of subjects and authors helps instructors supplement their courses in substantive areas of psychology with ease. The introductory essay prepares the reader for a deeper understanding of the contributions of each of the pioneers. Mamie Phipps Clark had a profound impact on the education of American children. Robert W. White pioneered a new approach to the study of persons across the lifespan. Lois Barclay Murphy's perspective on the strengths of developing children foreshadowed later developments in positive psychology. Florence Goodenough pioneered new testing methods for children. John Paul Scott was a pioneer in the field of behavior genetics. The book also highlights the many contributions of European pioneers: Jean Piaget, Charlotte Bühler, Heinz Werner, and Lev Vygotsky. Their contributions were carried forward by J. McVicker Hunt in the U.S. and Helena Antipoff in Brazil. Arnold Gesell's film studies of children's development remain a landmark accomplishment. Lawrence Kohlberg pioneered the study of moral development across the lifespan. Roger Barker's studies on aggression and leadership among children eventually led to the development of ecological psychology. Eleanor "Jackie" Gibson was famous for her work on the "visual cliff" and for her research on perception and development. Finally, Sidney Bijou had a long career delineating ways to improve the lives of children. Pickren's concluding essay draws connections between the pioneers and how they contributed to the advancement of the field. Intended as a supplementary text for undergraduate and/or graduate courses in the history of psychology and/or developmental, child, or lifespan psychology taught in psychology, education, and human development, this engaging book also appeals to those interested in and/or teaching these subject areas. Each of the 7 volumes in the Portraits of Pioneers Series contain different profiles bringing more than 140 of psychology's pioneers to life.

This book presents a series of informal biographies about major figures in the history of psychology. A unique combination of expertise and human appeal, the volume places the contributions of each pioneer in a new and fascinating perspective. For instance, several of the authors use the novel approach of having the pioneers return to the present day to reflect back on their work as it relates to the here and now. Revisions of speeches given in a popular series of invited addresses at psychological conventions, the chapters offer appealing glimpses into the lives of individuals who made a difference in the early years of psychology as a field of study. Each of the five volumes in this series contains different profiles thereby bringing more than 100 of the pioneers in psychology more vividly to life.

This brief, inexpensive text offers great flexibility in teaching the history of psychology. Used as a stand-alone text or with readers, this engaging book is noted for its analysis of the scientific and philosophical emergence of the field as well as its coverage of contemporary psychology and emerging areas. Readers appreciate the book's balanced coverage of experimental, applied, and clinical psychology, as well as the clear and succinct presentation of the field's major events and schools of thought. The sixth edition features an expanded pedagogical program with bolded terms, a complete glossary, more illustrations, and web-based instructional materials including PowerPoints, a test bank, discussion questions, and more. Special emphasis has also been placed on the role of the American Psychological Association (APA) in the history of psychology. Extensively updated throughout, the sixth edition features: A revised final chapter with a current analysis of the state of the field, including the growth of the APA as well as specialized organizations that promote the science and profession of psychology, and the push to influence policies that address global challenges, such as environmental sustainability, intergroup conflict, health disparities, and the population explosion. A discussion of the growth in the number and role of women and ethnic minorities in psychology, and the promotion of diversity across both demographic and intellectual perspectives. Recent developments in the growth of neuroscience, cognitive science, artificial intelligence, and the diversification and internationalization of psychology. Portraits of some major figures in the history of psychology, including psychology's first Nobel Prize winners. Recent and evolving changes in the practice of psychology, including more emphasis on "evidence-based practice," prescription privileges, and the emergence of psychological practice in health care. Recent changes in the APA, including new divisions and new elected officials and its emerging focus on advocacy. Used independently or as a supplement with readers, this brief text is intended for undergraduate and graduate courses on the history of psychology. Due to its brevity and engaging style, the book can be used in introductory courses to introduce students to the field. The enormous index and substantial glossary make this volume a useful desk reference for psychology and related disciplines.

This book offers glimpses into the personal and scholarly lives of 20 giants in the history of psychology. As in the earlier volumes, prominent scholars were invited to prepare chapters on a pioneer who had made important contributions in their own area of expertise. Some of the psychologists described may be the teachers of the instructors who will be the users of this book, potentially providing a personal connection of the pioneers to the students. A special section provides brief portraits of the editors and authors, containing interesting information about the relationship between the pioneers and the psychologists who describe them. Utilizing an informal, personal, sometimes humorous, style of writing, the book will appeal to students and instructors interested in the history of psychology. Each of the five volumes in this series contains different profiles thereby bringing more than 100 of the pioneers in psychology more vividly to life. Contents: Preface. R.E. Fancher, H. Schmidt, Gottfried Wilhelm Leibniz: Underappreciated Pioneer of Psychology. J.D. Hogan, G. Stanley Hall: Educator, Organizer, and Pioneer Developmental Psychologists. L.T. Benjamin, Jr., Harry Kirke Wolfe: A Teacher Is Forever. D.A. Dewsbury, James Rowland Angell: Born Administrator. W. Viney, L. Burlingame-Lee, Margaret Floy Washburn: A Quest for the Harmonies in the Context of a Rigorous Scientific Framework. N.K. Innis, William McDougall: "A Major Tragedy?" J.D. Hogan, D.N. Thompson, June Etta Downey: Pioneer of Personality Measurement. W.E. Pickren, Kurt Goldstein: Clinician and Philosopher of Human Nature. L.T. Benjamin, Jr., D.B. Baker, Walter Van Dyke Bingham: Portrait of an Industrial Psychologist. E.A. Gavin, Albert Michotte: A Psychologist for All Sites and Seasons. H. Gotzli, (Translated by H. Hecht), Wolfgang Metzger: Perceptions of His Life and Work. J. Rosenblith, Nancy Bayley: Pioneer in the Study of Growth and Psychological Development. E. Kurz-Milcke, N.K. Inni

This sixth book in the Portraits of Pioneers in Psychology Series preserves the diversity that has characterized earlier volumes as it brings to life psychologists who have made substantial contributions to the field of the history of psychology. These chapters illustrate the pioneering endeavors of such significant figures, and are written in a lively, engaging style by authors who themselves have achieved a reputation as excellent

scholars in the history of psychology. Several of the chapters are based on the author's personal acquaintance with a pioneer, and new, previously unavailable information about these luminaries is presented in this volume. Each of these volumes provides glimpses into the personal and scholarly lives of 20 giants in the history of psychology. Prominent scholars provide chapters on a pioneer who made important contributions in their own area of expertise. A special section in each volume provides portraits of the editors and authors, containing interesting information about the relationship between the pioneers and the psychologists who describe them. Utilizing an informal, personal, sometimes humorous, style of writing, the books will appeal to students and instructors interested in the history of psychology. Each of the six volumes in this series contains different profiles, thereby bringing more than 120 of the pioneers in psychology more vividly to life.
