[PDF] Principles Of Transaction Processing | Download Full ...

Description. Transaction processing is designed to maintain a system's Integrity (typically a database or some modern filesystems) in a known, consistent state, by ensuring that interdependent operations on the system are either all completed successfully or all canceled successfully.. For example, consider a typical banking transaction that involves moving \$700 from a customer's savings ...

Transaction processing - Wikipedia

A second property of transactions is consistency □ a transaction program should maintain the consistency of the database. That is, if you execute the transaction all by itself on a database that's initially consistent, then
