Rushed to the scene is a team of American scientists who descend together into the depths to investigate the astonishing discovery. What they find defies their imaginations and mocks their attempts at logical explanation. It is a spaceship, but apparently it is undamaged by its fall from the sky. And, most startling, it appears to be at least three hundred years old, containing a terrifying and destructive force that must be controlled at all costs.

In the middle of the South Pacific, a thousand feet below the surface of the water, a huge vessel is discovered resting on the ocean floor. It is a spaceship of phenomenal dimensions, apparently undamaged by its fall from the sky. And, most startling, it appears to be at least three hundred years old. But even more fantastic—and frightening—is what waits inside . . .

The third edition of this definitive and popular book continues to pursue the question: what is the most efficient way to pack a large number of equal spheres in n -dimensional Euclidean space? The authors also examine such related issues as the kissing number problem, the covering problem, the quantizing problem, and the classification of lattices and quadratic forms. There is also a description of the applications of these questions to other areas of mathematics and science such as number theory, coding theory, group theory, analogue-to-digital conversion and data compression, n -dimensional crystallography, dual theory and superstring theory in physics. New and of special interest is a report on some recent developments in the field, and an updated and enlarged supplementary bibliography with

Aikido and the Dynamic Sphere: An Illustrated Introduction provides a complete foundation in the practice of one of the most distinctive and effective Japanese martial arts. Aikido was created in Japan in the 1920's by Morihei Ueshiba, also known as Osensei. To possess the skills, techniques and attitude of the true practitioner of aikido, one must achieve a very high level of integration of the powers of mind and body, the harmonious combination of physical means and ethical motives. By controlling body position and learning how to harmonize vital physical and mental powers, anyone (regardless of size, strength or weight) can fend off attacks using this sophisticated martial art. Written and illustrated by husband/wife team, Oscar Ratti and Adele Westbrook, Aikido and the Dynamic Sphere, with over 1,200 illustrations, includes many Aikido techniques in chapters such as: What is Aikido? The Foundations of Aikido The Practice of Aikido The Basic Techniques of Neutralization Advanced Practice And more!

The Bourgeois Society

An international team of specialists examine the dynamic relation between women and the public sphere.

In the routine spectrum of our lives, we inhabit the public sphere. Whether in the street, the shopping center, or on the bus, we engage with the empowered, the disempowered, the omitted, and the powerful. Within the public sphere, the notion of public involves a complexity of approaches to aspects of everyday practices of power, performance, and place. Through these approaches, that which is public can be visualized, experienced, and contested in the construction, ceremony, and design of buildings, institutions, and daily activities. In a variety of ways, the conceptualization and contextualization of the public contributes to identity formations, narratives of community, and manifestations of the political that materially and discursively transpire within the public sphere in the perceptions of inequality, metaphors for knowledge, and critiques of consciousness. For this volume focused on interpretive methods and methodologies that address the concept of public, we present a lively engagement with methodological insight into the political digestion of the public sphere. We delve into models of and approaches to conducting research, the analysis of findings, and the reaffirmation of enhanced techniques of related inquiry in public spaces. We seek to explore the following questions: What is the public? How do we visualize/understand/experience the public? What are the ways in which these insights connect to articulations of citizenship and democracy? How is the public implicated in the political? The chapters
