During erection, parasympathetic neurons stimulate dilation of the arteries that deliver blood to the corpus cavernosa and spongiosum. As a result, blood collects in these blood vessels and causes the penis to begin to become erect. The developing erection also constricts the exiting veins of the penis.

The Male Reproductive System - CliffsNotes Study Guides

The reproductive system is the human organ system responsible for the production and fertilization of gametes and, in females, the carrying of a fetus. Both male and female reproductive systems have organs called gonads (testes in males, ovaries in females) that produce gametes (sperm or eggs) and sex hormones (such as testosterone in males and estrogen in
