Due to the economic significance of technological innovations, the Chief Information Officer (CIO) has been gathering prominence as an executive. His or her role is characterised by ambiguity and subject to research endeavours for 30 years. Nonetheless,

Access PDF The Transformational Cio

the current research about CIOs' leadership models is quite limited. This thesis fills this gap. Based on reports about CIOs' action and their role characteristics, three unifying leadership models can be derived: Resource based leadership, transformational leadership, and

Access PDF The Transformational Cio

strategic leadership. A resource based CIO leads his/her subordinates, guided by cost effectiveness. The transformational CIO leads with the help of his/her executive peers, by closely monitoring the external environment and collaboratively changing the IT infrastructure, over

time. The strategic CIO leads by setting the business agenda of the organization, alternating the business model with the help of IT. If applied successfully, these leadership models can yield positive outcomes for the organizations, such as competitive advantages. Contingently, certain

Access PDF The Transformational Cio

prerequisites must be in place. The organization's maturity for technological reforms, and perceived relevance of IT for the organizations business model need to match the leadership model.

"This book offers insightful and
