New York Times Bestseller: A history of the S&L scandal that caused a financial disaster for American taxpayers: "Hard to put down" (Library Journal). For most of the 20th century, savings and loans were an invaluable thread of the American economy. But in the 1970s, Congress passed sweeping financial deregulation at the insistence of industry insiders that allowed these once quaint and useful institutions to spread their taxpayer-insured assets into new and risky investments. The looser regulations and reduced federal oversight also opened the industry to an army of shady characters, white-collar criminals, and organized crime groups. Less than 10 years later, half the nation's savings and loans were insolvent, leaving the American taxpayer on the hook for a large hunk of the nearly half a trillion dollars that had gone missing. The authors of Inside Job saw signs of danger long before the scandal hit nationwide. Decades after the savings and loan collapse, Inside Job remains a thrilling read and a sobering reminder that our financial institutions are more fragile than they appear.

Tax Guide 2015 provides comprehensive coverage of all areas of taxation applicable to Ireland. Written in non-technical language by an expert team of tax practitioners, it covers: Income Tax; Capital Gains Tax; Value Added Tax; Employers' PAYE/PRSI; Corporation Tax; Capital Acquisitions Tax; Stamp Duties; Vehicle Registration Tax and Customs and Excise. As well as taking on board the provisions of the latest Finance Act it features detailed worked examples and extensive references to recent case law. It also contains a set of tables giving speedy access to allowances, tax rates, compliance deadlines and other invaluable information. Tax Guide 2015 is an ideal reference book that serves as a self-contained textbook and as a pointer to more detailed Bloomsbury Professional publications, such as Irish Income Tax, The Taxation of Companies, Irish Stamp Duty Law and Capital Acquisitions Tax. Previous edition ISBN: 9781780434612

China's engagement in Africa is generally portrayed simply as African countries being exploited for their mineral wealth by a wealthy political and

economic superpower. Is this always the case? Certain African countries have been able to use China's involvement in the region to grow their economies and solicit renewed interest from previously disengaged foreign powers by using their relationship with China to bolster their political capital. In this thought provoking and original work Lucy Corkin demonstrates how Angola has been amongst the most successful of African nations in this role. The concept of 'African agency' covers a wide range of different countries with very different capabilities and experiences of engaging with China. In each individual county there are a myriad of actors all with increasingly discernible agencies. Uncovering African Agency; Angola's Management of China's Credit Lines casts a fascinating new light on China's involvement with her largest African trading partner and through this shows how different African states and the governmental actors within them are able to exploit the relationship to their best advantage.

This volume contains the edited proceedings of the Working Conference on the Transfer and Diffusion of IT for Organizational Resilience, sponsored by the International Federation for Information Processing (IFIP) Working Group 8.6 (Transfer and Diffusion of Information Technology), and held in Galway, Ireland in June of 2006. The material contained in this book represents current thinking on the topic of resilience by academics and leading practitioners.

Traders Guns and Money is a wickedly comic exposé of the culture, games and pure deceptions played out every day in trading rooms around the world. And played out with other people's money. A sensational insider's view of the business of trading and marketing derivatives, this revised edition explains the frighteningly central role that derivatives and financial products played in the global financial crisis. This worldwide bestseller reveals the truth about derivatives: those financial tools memorably described by Warren Buffett as 'financial weapons of mass destruction'. Traders, Guns and Money will introduce you to the players and the practices and reveals how the real money is made and lost. The global financial crisis took almost everyone by surprise and even now new problems keep appearing and solutions continue to be elusive. In the original version of Traders, Guns and Money, Satyajit Das provided a highly prescient insight into the structure and risk of the world financial system exposing the problems that are becoming readily apparent. In a 2006 speech - The Coming Credit Crash - Das argued that: "an informed analysis ... shows that risk is not better spread but more leveraged and (arguably) more concentrated... This does not improve the overall stability and security of the financial system but exposes it to increased risk of a "crash".

Explores how humor can be explained across the various sub-disciplines of linguistics, in order to aid communication.

This book explores the philosophical understanding of the "energy consumption" in warehousing process that can be found in the literature. It presents known technical solutions that, if they are used in cold storage rooms, can effectively reduce energy consumption: through lower power consumption and/or energy recovery, such as the use of photovoltaic panels. The final part of the book explores the problems discussed on the basis of a concrete example - a project involving energy recovery in a refrigerated warehouse. This publication also describes the design of refrigerated warehouses, taking into account their energy intensity. In the case of logistic warehousing systems, the pallets in warehouses can offer a source of energy - namely of the potential energy stored in the loads on the shelves. Given that today's construction warehouses have heights on the order of several tens of meters, that energy can be considerable. In the case of refrigerated warehouses and cold storage facilities, it is necessary to monitor the stored goods in order to maintain a constant freezing temperature, in keeping with the requirements of the HACCP system. Inevitably, this calls for constant cooling of the air inside the warehouse, and thus produces a fixed, high and constant level of energy usage. And, just as in any other context, it becomes important to identify methods for reducing energy consumption.

Love, Lavender Pen is a collection of words, rhymes, and poetries.
