The ultimate reference for Triumph lovers and fans of British motorcycles, *The Complete Book of Classic and Modern Triumph Motorcycles 1937-Today* collects all of the motorcycles from this iconic brand in a single illustrated volume. In this revised and updated edition, you'll find the all-new Bonneville lineup introduced for the 2016 model year as well as other Triumphs through 2019. Originally formed as a bicycle company in 1885, Triumph produced its first motorcycle in 1902, which was simply a bicycle fitted with a Belgian Minerva engine. From there, the company, in various iterations, went on to build some of the most iconic motorcycles of all time. Written by respected Triumph expert Ian Falloon, this luxurious reference covers all of the major and minor models, with an emphasis on the most exemplary, era-defining motorcycles such as the Thunderbird, Tiger, Trophy, Bonneville, and new machines such as the Speed Triple, Thruxton, and Daytona 675. Detailed technical specifications are offered alongside compelling photography, much of it sourced from Triumph's archives. *The Complete Book of Classic and Modern Triumph Motorcycles 1937-Today* also features important non-production models and factory racing and speed-record-setting motorcycles that have become integral parts of Triumph's stellar reputation. This is a book no Triumph fan should be without!

This portfolio of international articles reports on the liquid cooled in-line 4-cylinder sports bikes which were first introduced in 2003. Triumph began development of a three-cylinder 675cc supersports machine in 2000, alongside the 955i Daytona triple. The first 675 engine was tested on the dyno in 2003 and the first pre-production prototype took to the streets in 2004. The new triple boasted a 10bhp power boost over the 650 with no weight penalty - Triumph had finally found the right formula for their world class middleweight. When the 675 was launched in 2006, demand outstripped supply. The 675 has been hailed as the best British sportsbike ever and, possibly, one of the greatest sportsbikes of all time. Articles include "first rides", new model introductions, road and comparison tests, technical report, full specifications and performance data, plus a comprehensive buying guide which offers advice on acquiring a good pre-owned Daytona.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.
