What causes a government to invest--or not invest--in poor citizens, especially mass education? In *The Education of Nations*, Stephen Kosack focuses on three radically different developing countries whose developmental trajectories bear little resemblance to each other--Brazil, Ghana, and Taiwan--and offers an elegant and pragmatic answer to this crucially important question.

Praised for the clarity of its writing, careful research, and distinctive theme – that urban politics in the United States has evolved as a dynamic interaction between governmental power, private actors, and a politics of identity – *City Politics* remains a classic study of urban politics. Its enduring appeal lies in its persuasive explanation, careful attention to historical detail, and accessible and elegant way of teaching the complexity and breadth of urban and regional politics which unfold at the intersection of spatial, cultural, economic, and policy dynamics. Now in a thoroughly revised 10th edition, this comprehensive resource for undergraduate and graduate students, as well as well-established researchers in the discipline, retains the effective structure of past editions while offering important updates, including: All-new sections on immigration, the Black Lives Matter Movement, the downtown condo boom, and the impact of the sharing economy on urban neighborhoods (especially the rise of Airbnb). News gathering is a large, complicated and often messy task that has traditionally been viewed by journalists as irretrievably idiosyncratic, best learned through trial and error. Advanced Reporting takes the opposite approach, focusing on reporting as a process of triangulation based on three essential activities: analyzing documents, making observations and conducting interviews. In this readable book, veteran journalism professor Miles Maguire shows how the best reporters use these three tools in a way that allows them to cross-check and authenticate facts, to reduce or eliminate unsupportable allegations and to take readers and viewers to a deeper level of insight and understanding. This book will help to prepare students for a profession marked by increasing complexity and competition. To succeed in this environment, journalists must learn to make the most of digital media to intensify the impact of their work. At the same time, reporters must contend with a host of sophisticated public relations techniques while engaging with news audiences that no longer just consume journalism, but also collaborate in its creation. Discussion questions and exercises help students put theory into practice.
